

# 11 – Additional declaration - Great Britain -

Phytosanitary Certificate n. UE/IT/\_\_\_\_\_ Dated \_\_\_\_/\_\_\_\_/\_\_\_\_

Referred to Statutory Instruments 2020/1527, list of plants for planting correspond to special requirements

## ANNEX 7 PART A

4 - official statement that the place of production has been established by the national plant protection organisation in accordance with ISPM10 as a place of production that is free from *Clavibacter sepedonicus* (Spieckermann & Kotthoff) Li *et al.* and *Synchytrium endobioticum* (Schilbersky) Percival.

8 a,b (ii) - (a) in all cases, that no symptoms of the relevant pests have been observed on the plants during their complete cycle of vegetation, and (b) in the case of plants originating in any third country where *Bemisia tabaci* (Gennadius) or other vectors of the relevant pests are known to occur, that no symptoms of the relevant pests have been observed on the plants during their complete cycle of vegetation and: (ii) that the site of production has been found free from *Bemisia tabaci* (Gennadius) and other vectors of the relevant plant pests on official inspections carried out at appropriate times to detect those pests.

9 a (ii), b (I) - official statement: (a) in all cases: (ii) that no symptoms of Tomato leaf curl New Delhi Virus have been observed on the plants during their complete cycle of vegetation, and (b) in the case of any plants originating in an area where *Bemisia tabaci* (Gennadius) or other vectors of Tomato leaf curl New Delhi Virus are known to occur: (i) that their site of production has been found free from *Bemisia tabaci* (Gennadius) and other vectors of Tomato leaf curl New Delhi Virus on official inspections carried out at appropriate times to detect the pest

12 d - (d) in the case of plants for which there is evidence from their packing or their flower development or from other means that they are intended for direct sale to final consumers not involved in professional plant production, an official statement that they have been officially inspected and found free from *Bemisia tabaci* (Gennadius) immediately prior to their movement.

28 b - (b) an official statement that no symptoms of *Candidatus Phytoplasma 'solani'* Quaglino *et al.* have been observed on the plants at the place of production since the beginning of the last complete cycle of vegetation.

40 b - (b) an official statement that no signs of *Liriomyza huidobrensis* (Blanchard) or *Liriomyza trifolii* (Burgess) have been observed at the place of production, on official inspections carried out at least monthly during the three months prior to harvesting.

47 c - (c) an official statement that no symptoms of *Cryphonectria parasitica* (Murrill) Barr have been observed at the place of production or in its immediate vicinity since the beginning of the last complete cycle of vegetation.

51 - official statement that no symptoms of *Candidatus Phytoplasma 'ulmi'* Lee, Martini, Marcone & Zhu have been observed at the place of production or in the immediate vicinity of the place of production since the beginning of the last complete cycle of vegetation.

52 - official statement that the plants originate in a place of production which has been established by the national plant protection organisation in accordance with ISPM10 as a place of production that is free from *Ips duplicatus* (Sahlberg).

53 - official statement that the plants originate in a place of production which has been established by the national plant protection organisation in accordance with ISPM10 as a place of production that is free from *Ips typographus* L.

54 - official statement that the plants originate in a place of production which has been established by the national plant protection organisation in accordance with ISPM10 as a place of production that is free from *Ips amitinus* (Eichhoff).

57 c - (c) an official statement that the plants have been produced in nurseries which, along with their vicinity, have been found free from *Thaumetopoea pityocampa* (Denis & Schiffermüller) on the basis of official inspections and official surveys carried out at appropriate times.

58 a - (a) an official statement that they originate in areas known to be free from *Dothistroma pini* Hulbary and *Lecanosticta acicola* (von Thümen) Sydow

59 a - (a) an official statement that the plants have been grown throughout their life in an area\* established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Geosmithia morbida* Kolarik, Freeland, Utley & Tisserat and its vector, *Pityophthorus juglandis* Blackman

61 - official statement that the plants have been grown throughout their life in an area\* established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Ceratocystis platani* (J.M. Walter) Engelbr. & T.C. Harr.

67 a - (a) an official statement that the plants have been grown throughout their life in a place of production which is registered and supervised by the national plant protection organisation in the country of origin and which is situated in an area\* established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Anoplophorachinensis* (Forster)

68 a - (a) an official statement that the plants have been grown throughout their life in a place of production which is registered and supervised by national plant protection organisation in the country of origin and is situated in an area\* established by that organisation in accordance with ISPM4 as an area that is free from *Anoplophora glabripennis* (Motschulsky)

71 b - (b) an official statement that the plants have been grown throughout their life in a place of production which is registered and supervised by the national plant protection organisation in the country of origin and is situated in an area\* established by that organisation in accordance with ISPM4 as an area that is free from *Pseudomonas syringae* pv. Actinidiae Takikawa, Serizawa, Ichikawa, Tsuyumu & Goto

74 a - (a) an official statement that they originate in an area\* which, in accordance with the measures specified in ISPM4, is known to be free from *Candidatus Phytoplasma 'mali'* Seemüller & Schneider

76 b - (b) that in either case, no symptoms of diseases caused by *Candidatus Phytoplasma 'pruni'* (16SrIII-A) Davis, Zhao, Dally, Lee, Jomantiene & Douglas have been observed on the plants at the place of production, or on susceptible plants in its immediate vicinity, since the beginning of the last three complete cycles of vegetation

77 b - (b) an official statement that no symptoms of diseases caused by *Candidatus Phytoplasma 'prunorum'* Seemüller & Schneider have been observed on plants at the place of production since the beginning of the last complete cycle of vegetation.

78 a - (a) an official statement that they originate in an area which, in accordance with the measures specified in ISPM4, is known to be free from *Pseudomonas syringae* pv. *persicae* (Prunier, Luisetti & Gardan) Young, Dye & Wilkie

79 c - (c) an official statement that they have been derived in direct line from mother plants which have shown no symptoms of *Xanthomonas arboricola* pv. *pruni* (Smith) Vauterin *et al.* during the last complete cycle of vegetation and no symptoms of that pest have been observed on the plants at the place of production since the beginning of the last complete cycle of vegetation

80 a - (a) an official statement that the plants have been grown throughout their life in a place of production which is registered and supervised by the national plant protection organisation in the country of origin and is situated in an area\* established in accordance with ISPM4 as an area that is free from *Aromia bungii* (Faldermann)

85 b - (b) an official statement that no symptoms of *Diaporthe vaccinii* Shear have been observed at the production site over the last complete growing season.

86 - official statement that no symptoms of *Xylophilus ampelinus* (Panagopoulos) Willems, Gillis, Kersters, van den Broeke & De Ley have been observed on the mother stock plants at the place of production since the beginning of the last two complete cycles of vegetation.

87 a - (a) an official statement that the plants originate in an area, which in accordance with the measures specified in ISPM4, is known to be free from Grapevine flavescence dorée phytoplasma

90 c - (c) an official statement that they have, during a period of at least two years prior to export, been grown in a place of production: (i) which is registered and supervised by the national plant protection organisation in the country of origin, (ii) where the plants were placed in a site with complete physical protection against the introduction of *Paysandisia archon* (Burmeister), and (iii) where, during three official inspections per year carried out at appropriate times, including immediately prior to export, no signs of *Paysandisia archon* (Burmeister) have been observed.

91 c - (c) an official statement that they have, during a period of at least two years prior to export, been grown in a place of production: (i) which is registered and supervised by the national plant protection organisation in the country of origin, (ii) where the plants were placed in a site with complete physical protection against the introduction of *Rhynchophorus ferrugineus* (Olivier), and (iii) where, during three official inspections per year carried out at appropriate times, including immediately prior to export, no signs of *Rhynchophorus ferrugineus* (Olivier) have been observed.

## ANNEX 7 PART B

1 b - (b) an official statement that since the beginning of the last complete cycle of vegetation no signs of *Phytophthora ramorum* Werres, De Cock & Man in 't Veld have been observed on the plants at the place of production during official inspections, including laboratory testing of any suspicious symptoms, carried out at least twice during the growing season at appropriate times when the plants were in active growth and with an intensity which took into account the particular production system of the plants

4 a - (a) an official statement that they have been grown in a site that is subject to annual official inspection, and in the case of symptoms of *Xylella fastidiosa* (Wells *et al.*), sampling, taking into account the technical guidelines for the survey of *Xylella fastidiosa* (Wells *et al.*) published by the European Commission from time to time (a), and testing in line with international standards for the presence of *Xylella fastidiosa* (Wells *et al.*), in which the absence of *Xylella fastidiosa* (Wells *et al.*) was confirmed

4 b (i) - (b) in the case of plants for planting, other than seeds, of *Coffea*, *Lavandula dentata* L., *Nerium oleander* L., *Olea europaea* L., *Polygala myrtifolia* L. and *Prunus dulcis* (Mill.) D.A. Webb, an official statement: (i) that they have been grown in a site that is subject to annual official inspection and sampling, taking into account the technical guidelines for the survey of *Xylella fastidiosa* (Wells *et al.*) published by the European Commission from time to time, and testing in line with international standards for the presence of *Xylella fastidiosa* (Wells *et al.*), using a sampling scheme able to identify with 99% reliability the level of presence of infected plants of 5%, in which the absence of *Xylella fastidiosa* (Wells *et al.*) was confirmed. For the purposes of point (b), the presence of *Xylella fastidiosa* (Wells *et al.*) must have been screened by one test, and in the case of positive results, its presence must have been identified by carrying out, in line with international standards, at least one positive molecular test

4 b (ii) - (b) in the case of plants for planting, other than seeds, of *Coffea*, *Lavandula dentata* L., *Nerium oleander* L., *Olea europaea* L., *Polygala myrtifolia* L. and *Prunus dulcis* (Mill.) D.A. Webb, an official statement: (i) that they have been grown in a site that is subject to annual official inspection and sampling, taking into account the technical guidelines for the survey of *Xylella fastidiosa* (Wells *et al.*) published by the European Commission from time to time, and testing in line with international standards for the presence of *Xylella fastidiosa* (Wells *et al.*), using a sampling scheme able to identify with 99% reliability the level of presence of infected plants of 5%, in which the absence of *Xylella fastidiosa* (Wells *et al.*) was confirmed, and (ii) in respect of any plants for planting, other than seeds, of *Polygala myrtifolia* L., that prior to their movement out of their production site and as close to that time as possible, each lot of plants was subjected in addition to official visual inspection and sampling, as well as testing, in line with international standards for the presence of *Xylella fastidiosa* (Wells *et al.*), using a sampling scheme able to identify with 99% reliability the level of presence of infected plants of 5%, in which the absence of *Xylella fastidiosa* (Wells *et al.*) was confirmed. For the purposes of point (b), the presence of *Xylella fastidiosa* (Wells *et al.*) must have been screened by one test, and in the case of positive results, its presence must have been identified by carrying out, in line with international standards, at least one positive molecular test.
